Arial Narrow:
  Full Name: Arial Narrow
  Family: Arial Narrow
  Style: Regular
  Version: Version 2.38.1x
  Vendor: The Monotype Corporation
  Unique Name: Arial Narrow Regular : 2007
  Designer: Robin Nicholas, Patricia Saunders
  Copyright: © 2007 The Monotype Corporation. All Rights Reserved.
  Trademark: Arial is a trademark of The Monotype Corporation in the United States and/or other countries.
  Description: Monotype Drawing Office 1982. A contemporary sans serif design, Arial contains more humanist characteristics than many of its predecessors and as such is more in tune with the mood of the last decades of the twentieth century. The overall treatment of curves is softer and fuller than in most industrial-style sans serif faces. Terminal strokes are cut on the diagonal which helps to give the face a less mechanical appearance. Arial is an extremely versatile family of typefaces which can be used with equal success for text setting in reports, presentations, magazines etc, and for display use in newspapers, advertising and promotions.

---

Trebuchet takes its inspiration from the sans serifs of the 1930s which had large x heights and round features intended to promote readability on signs. The typeface name is credited to a puzzle heard at Microsoft, where the question was asked, "could you build a Trebuchet (a form of medieval catapult) to launch a person from the main campus to the consumer campus, and how?" The Trebuchet fonts are intended to be the vehicle that fires your messages across the Internet. "Launch your message with a Trebuchet page".

The Wingdings fonts were designed by Kris Holmes and Charles Bigelow in 1990 and 1991. The fonts were originally named Lucida Icons, Arrows, and Stars to complement the Lucida text font family by the same designers. Renamed, reorganized, and released in 1992 as Microsoft Wingdings, the three fonts provide a harmoniously designed set of icons representing the common components of personal computer systems and the elements of graphical user interfaces.

There are icons for PC, monitor, keyboard, mouse, trackball, hard drive, diskette, tape cassette, printer, fax, etc., as well as icons for file folders, documents, mail, mailboxes, windows, clipboard, and wastebasket. In addition, Wingdings includes icons with both traditional and computer significance, such as writing tools and hands, reading glasses, clipping scissors, bell, bomb, check boxes, as well as more traditional images such as weather signs, religious symbols, astrological signs, encircled numerals, a selection of ampersands and interrobangs, plus elegant flowers and flourishes.

Pointing and indicating are frequent functions in graphical interfaces, so in addition to a wide selection of pointing hands, the Wingdings fonts also offer arrows in careful gradations of weight and different directions and styles. For variety and impact as bullets, asterisks, and ornaments, Wingdings also offers a varied set of geometric circles, squares, polygons, targets, and stars.

The Trebuchet fonts were designed by Vincent Connare in 1996, is a humanist sans serif designed for easy screen readability. Trebuchet takes its inspiration from the sans serifs of the 1930s which had large x heights and round features intended to promote readability on signs. The typeface name is credited to a puzzle heard at Microsoft, where the question was asked, “could you build a Trebuchet (a form of medieval catapult) to launch a person from the main campus to the consumer campus, and how?” The Trebuchet fonts are intended to be the vehicle that fires your
messages across the Internet. "Launch your message with a Trebuchet page".

**Description:** The Didot family were active as designers for about 100 years in the 18th and 19th centuries. They were printers, publishers, typeface designers, inventors and intellectuals. Around 1800 the Didot family owned the most important print shop and font foundry in France. Pierre Didot, the printer, published a document with the typefaces of his brother, Firmin Didot, the typeface designer. The strong clear forms of this alphabet display objective, rational characteristics and are representative of the time and philosophy of the Enlightenment. Adrian Frutiger’s Didot is a sensitive interpretation of the French Modern Face Didot. Another model for this design is the Henriade, a historical printing of the original Didot from 1818. The font Didot gives text a classic and elegant feel.

<td>Description</td>
<td>Trebuchet, designed by Vincent Connare in 1996, is a humanist sans serif designed for easy screen readability. Trebuchet takes its inspiration from the sans serifs of the 1930s which had large x heights and round features intended to promote readability on signs. The typeface name is credited to a puzzle heard at Microsoft, where the question was asked, &quot;could you build a Trebuchet (a form of medieval catapult) to launch a person from the main campus to the consumer campus, and how?&quot; The Trebuchet fonts are intended to be the vehicle that fires your messages across the Internet. &quot;Launch your message with a Trebuchet page&quot;.</td>

Designer:       Paul Renner (1878-1956) was a painter, typographer, typeface designer and teacher. Between 1908 and 1917 he designed thousands of books for Munich publishers in a refined traditional style. In the early 1920s he began to support the modern styles of architecture and typography, becoming a leading proponent of the New Typography. Renner is best known for designing the typeface Futura, which became a standard tool for the New Typography, and remains a popular typeface today. Futura does give a restful, almost bland impression, which accords with Renner's objectives. Futura seems classical, not only due to the form of its capitals, but also to the open, wide forms of the geometrical small letters. The typeface relies on notions of classical, yet contemporary form, - harmony and evenness of texture. Thanks to the modern digital technology Futura lives on in a greater variety than ever, offering a wide choice of typographic solutions for contemporary design in the new millennium.
